

# CHAIR FEATURES

The Offex collection provides you with a wide selection of chairs that provide you with support, comfort, style and most importantly promoting good health. Below are a number of features that help you choose the correct chair for your body type and size. You will find the Offex syntax throughout the Offex collection products pages to help you identify what features and mechanisms the chairs have.

## SEAT/CHAIR MOVEMENTS

Gas lift chairs raise or lower to allow feet to rest flat on the floor and enhances under thigh blood flow.

Horizontal seat adjustment allows the user to fix his or her seat depth at different positions for optimal seating posture & back to back rest contact

Centre tilt mechanism allows the chair to tilt from a pivot point under the centre of the seat.

Knee tilt mechanism tilts from a near front pivot point which keeps feet on the floor & maintains stability

Asyncon mechanism allows the user to adjust the back rest and the seat separately. This gives the option of different posture position capability

Syncon mechanism is designed for both the back rest and the seat to tilt simultaneously.

Lockable mechanism allows the user to lock the back to one upright position

Lockable mechanism allows the user to lock different pivoted angle positions of the back.

## BACKREST ADJUSTMENTS

Flex back mechanism is a spring loaded back which is in constant contact with the user as they lean back.

Tilt back rest mechanism allows the user to angle her or his back rest independently in different resting positions

Anti-shock mechanism stops the back rest from been thrown forward when the mechanism is unlocked

Height adjustable back rest allows the user to position the lumbar support points of the chair according to their own body type.

Adjustable lumbar support allows the user to reposition or align the lumbar according to his or her proportionality.

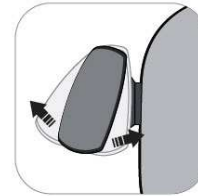

Lumbar support provides the user optimal back support to promote proper posture for all day comfort.

Tension lever allows the user to adjust the tilting tension of the chair according to his or her weight.

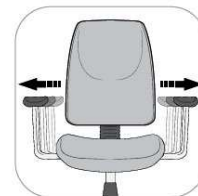

## OTHER FEATURES

Adjustable arm pads allow the user to rotate the pads inward and outward.

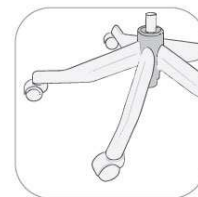

Vertical adjustable arms gives the user an option to change the height of his or her resting arm position.

Horizontal adjustable arms gives the user an option to adjust his or her arm resting position outward or inward.

Adjustable head rest allows the user to position the headrest to best fit their body.

Heavy duty 5 star metal base

Soft wheel casters are suitable for both carpet floors and hard surfaces.

Custom moulded cushions to provide a more ergonomic seating surface profile. This can either be the back rest or the seat or both.
