

WHY SUGGESTS TO USE THE ELECTRIC HEATED TOWEL RAIL?

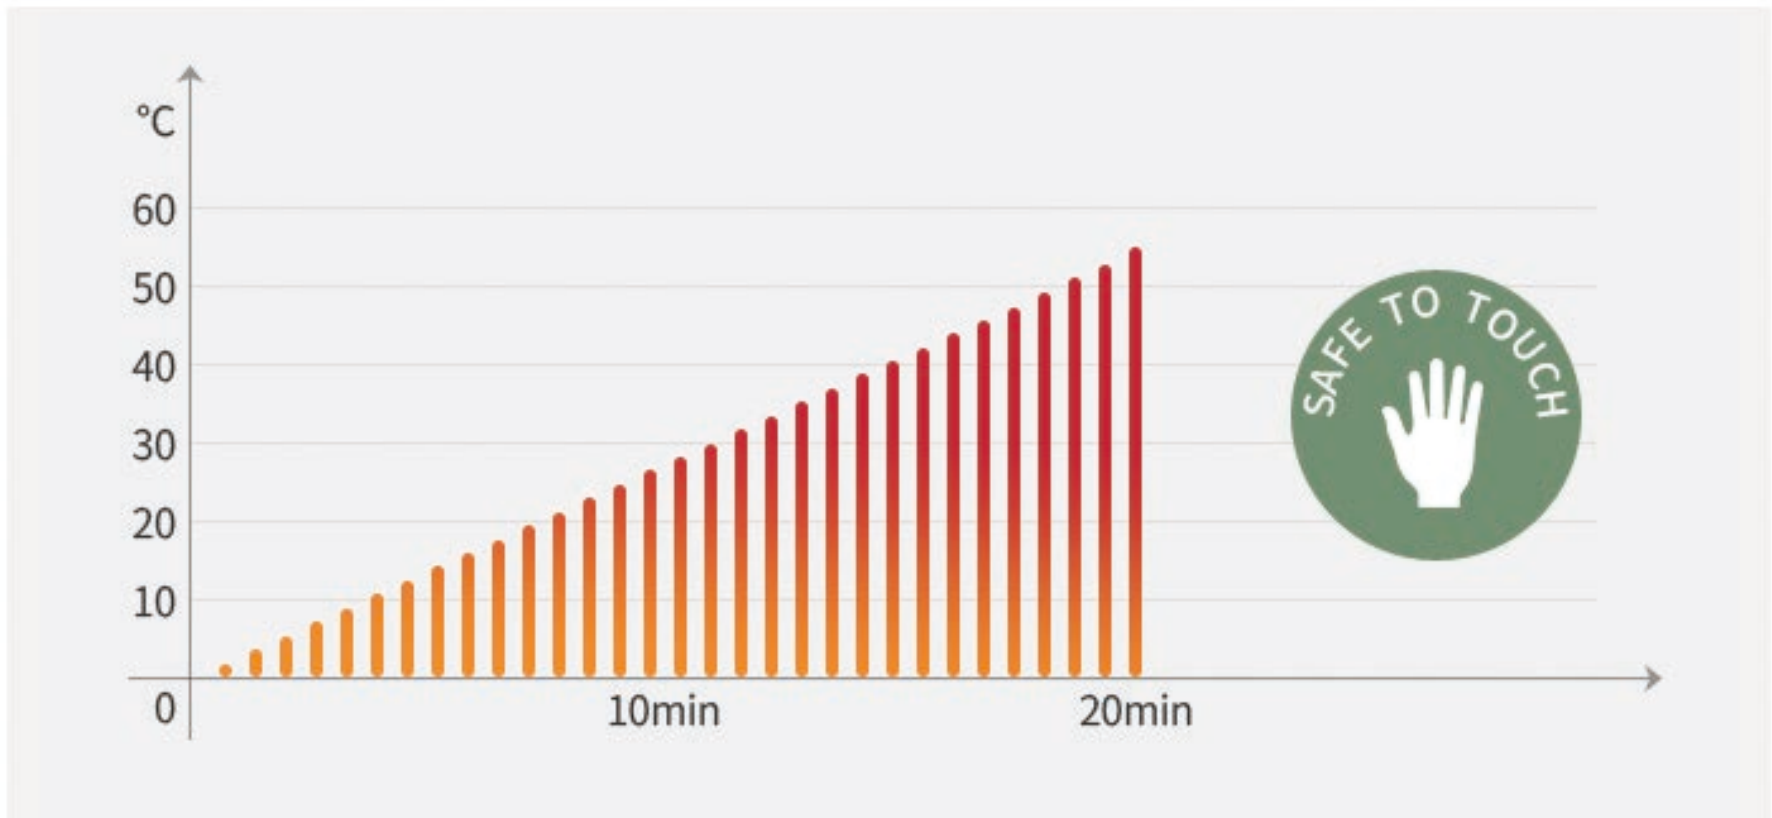

A: There is heavy moisture in bathroom, the towel is very difficult to dry with the common towel rack. And it is very easy to mould and breed bacteria and mites when exposed to air for a long time, These bacteria and mites can cause respiratory diseases and skin problems.

FAST WARM UP

20 Minutes to heat up your towel ,with a safe tempature range 50-55°C.
Bacteria germs and mould don't stand a chance.

SMART HEATED

ELECTRIC HEATED TOWEL RAIL

Drying clothes or towel
