

HEM-4011AU

3-INCH DEGRADE CEILING FAN  
USE AND CARE GUIDE

Labeling the blade arms to the motor

- 1. Loosen the 4 screws holding the two sections on the motor.
- 2. Lay out the 4 blades in a row.
- 3. Mark the center of the blade with the hole.
- 4. Mark the center of the blade with the hole.
- 5. Push the hole of the blade through the hole.
- 6. Check for square fit. If not square, trim the hole with the hole saw and sandpaper. Do not sandpaper the hanging pin.
- 7. Push the hole of the blade through the hole.
- 8. Push the hole of the blade through the hole.
- 9. Push the hole of the blade through the hole.
- 10. Push the hole of the blade through the hole.

Installation of the hanging bracket

**CONCRETE CEILING**

For concrete ceiling, use the provision kit with concrete bolts to join holes according to the length of expansion sleeve. Then use the electrical mounting screws to fit the hanging bracket onto the ceiling (concrete is made according to actual requirements of the customer).

**STEP 1 - CONCRETE CEILING**

SWITCH OFF THE ELECTRICAL WIRING AT THE CIRCUIT BREAKER FUSE BOX.

1. Use the Hanging Bracket as a guide, mark the spots where the 4 Expansion Bolts will be drilled.
2. Remove the Hanging Bracket. Drill 2 holes and insert 2 Expansion Bolts into the concrete ceiling. Install the mounting bracket and secure with the Hangers, Spring Washers and Nuts.

**IMPORTANT: SCREWS & NUTS MUST BE FASTENED TO 2x4 STUDS**

**WOODEN CEILING**

For wooden ceiling, use wood screws to drill on the wooden beam of the Junction box to fit the hanging bracket (concrete is made according to actual requirements of the customer).

**STEP 2 - WOODEN CEILING**

SWITCH OFF THE ELECTRICAL WIRING AT THE CIRCUIT BREAKER FUSE BOX.

1. Use the Hanging Bracket as a guide, mark the spots where the 4 Self-Tapping Screws will be drilled.
2. Remove the Hanging Bracket. Drill 4 holes for 3/8" diameter. Install the mounting bracket onto wooden ceiling with the Self-Tapping Screws & Washers.

Making the electrical connections

Assembly - Hanging the Fan (continued)

**Preparing for mounting**

1. Lay out the fan assembly on a flat surface.

2. Check the fan assembly for any damage.

3. Check the fan assembly for any damage.

4. Check the fan assembly for any damage.

Pre-Installation

Fan Motor assembly - 1 PCS

Slide on mounting bracket (black canopy - 1 PCS)

4-6 Channel assembly - 1 PCS

Conex - 4 PCS

Coating cover - 1 PCS

4-6 Channel assembly - 1 PCS

NOTE: Hardware not shown to actual size.

INSTALLATION INSTRUCTION

**Selection of hanger pipes**

1. The hanger pipe of all expansion bolts must be the same length.

2. The hanger pipe must be fixed with the hanger pipe at the top of the ceiling.

3. The bottom of the hanger pipe must be within 2.5 inches.

**Install remote control**

1. Lay out the remote control on a flat surface.

2. Check the remote control for any damage.

3. Check the remote control for any damage.

**Preparing for mounting**

1. Lay out the fan assembly on a flat surface.

2. Check the fan assembly for any damage.

3. Check the fan assembly for any damage.

Install downrod assembly

1. Lay out the downrod assembly on a flat surface.

2. Check the downrod assembly for any damage.

3. Check the downrod assembly for any damage.

Hang the fan

1. Lay out the fan assembly on a flat surface.

2. Check the fan assembly for any damage.

3. Check the fan assembly for any damage.
