HOW TO INSTALL

Label the position and drilling

Install and fix the base

Insert expansion screws

Install the cover and screws

Fix with Screws

Done

1. Installation position: Check the wall, get the suitable position and mark it. Do not install

the wall column to avoid potential dangerous.

2. Mark the bolts position: Mark the bolts points with bottom cover

3. Drilling: drilling on the screw hole annotation.

4. Base installation: Put the expansion screws into the drilling holes, fix the base with bolts

5. Installation of the cover: Put the covers on the based see figure 4 and fix the bolts
