

## GU10 TRACK SPOT LIGHT

### GU10 TRACK SPOT LIGHT SERIES

LED READY (SUPPLIED WITHOUT BULBS / LAMP/S)

#### INSTALLATION

**THIS FITTING CAN BE "DIY" INSTALLED ON SINGLE CIRCUIT (3 WIRE) TRACK [LF5300 SERIES]. THE TRACK MUST BE INSTALLED BY A LICENSED ELECTRICIAN.**

This fitting is designed to be connected to a 240v 50Hz power supply.

This fitting is designed to be installed indoors in an appropriate location. It is made from materials which may be affected by a salty or corrosive environment, and this should be considered when selecting and installing the fitting.

Care should be taken with the fittings, as damage to the finish may occur if inappropriately handled during installation.

This fitting cannot be modified in any way.

- ① Ensure that the POWER is OFF.
- ② Place the fitting into the track and turn 90 degrees ensuring it is firmly attached.
- ③ The lamp/s should be fitted, taking note of the LAMP GUIDE on this instruction sheet.
- ④ The power can be turned ON, and the fitting tested.
- ⑤ When adjusting the spot heads to the desired position, care should be taken as they may be hot.

#### WARRANTY

This fitting is warranted from manufacturing defects for 1 year from the date of purchase. It must be installed by a licensed electrician, in accordance with these instructions. Any claim under warranty must be with the store where purchased. The goods must be returned with proof of purchase for replacement. This warranty does not take away any rights the purchaser has under consumer law.
