Minimum Cabinet Interior Dimension Requirements

STEP 1: Mount frame to cabinet base

Front of cabinet
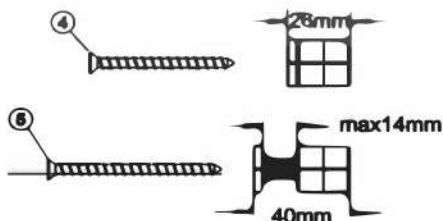

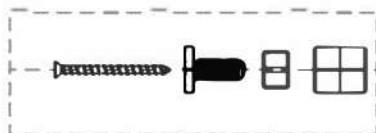

42.5mm
30.5mm
320mm
Ø5mm
82mm
335mm
510mm

Position frame on cabinet floor (see diagram)

Affix saddles (1) to frame using screws (2) and screws (3) – (see diagram)

STEP 2: Affixing side stabilisers (optional)

NOTE: It is recommended to install the stabilisers to enhance the stability of the installed product

Adjust the stabiliser width to suit cabinet width.

Attach stabiliser to frame using part 4 or part 5 screw to suit cabinet

510mm
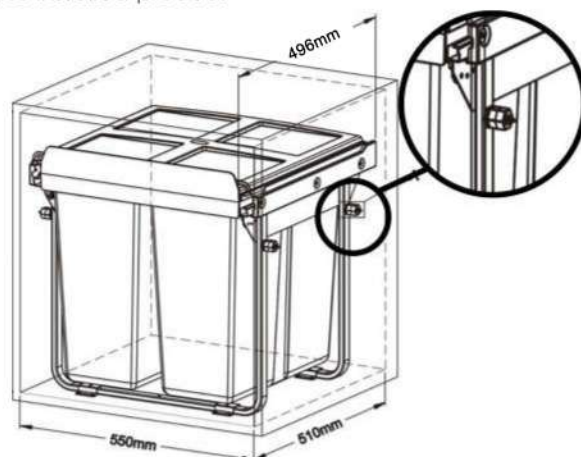

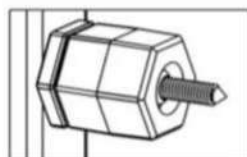

STEP 3: Affixing door (optional)

Mounting the cabinet door to the frame allows the bin to slide out when the cabinet door is pulled out. The optional door mount kit is included in the box (if you purchased the door mount version).

1. Lift the locking levers and remove the front part of the runner
2. Put the cabinet door on a flat surface, front facing down. Place the front part of the runner with the door connector on the top of the door
3. Measure and make sure the door will be aligned with the cabinet before drilling the hole and screw the door connector onto the door.
4. Put the front part of the runner (with the door attached) back to the frame, push it back into the runner until it clicks.
5. Align the door to the cabinet using the adjustment screws.
