⑤ ③ ① ②
Position frame on cabinet floor (see diagram)

Affix saddles (1) to frame using screws (2) and screws (3) – (see diagram)

STEP 2: Affixing side stabilisers

NOTE: It is recommended to install the stabilisers to enhance the stability of the installed product

Adjust the stabiliser width to suit cabinet width.

16~21 mm
21~30mm
30~40mm

A

Attach stabiliser to frame using part 4 or part 5 screw to suit cabinet

498mm
420mm
510mm

STEP 3: Affixing door

Non-door mount installation If you are not attaching a door then it is recommended you affix the part 7 nuts and bolts into the 3 mounting holes on each side of the frame for enhanced stability

Mounting the cabinet door to the frame allows the bin to slide out when the cabinet door is pulled out. The optional door mount kit is included in the box (if you purchased the door mount version).

1. Lift the locking levers and remove the front part of the runner
2. Put the cabinet door on a flat surface, front facing down. Place the front part of the runner with the door connector on the top of the door
3. Measure and make sure the door will be aligned with the cabinet before drilling the hole and screw the door connector onto the door.
4. Put the front part of the runner (with the door attached) back to the frame, push it back into the runner until it clicks.
5. Align the door to the cabinet using the adjustment screws.
