Assembly Tips:

1. For larger items, please ensure that you have sufficient space and people (as indicated on page 1) to assemble your product safely.
2. We recommend that, where possible, all items are assembled near to the area in which they will be placed in use, to avoid moving the product unnecessarily once assembled.
3. For the protection of your furniture, we recommend that the product is placed on a protected surface during assembly to prevent any damage.
4. During assembly please take care not to over-tighten, any fittings, as this may damage the product.
5. Always place the product on a flat, steady and stable surface.
6. Do not stand on the product. Do not use the product as a stepladder.
7. This product is intended for indoor, household use only as it is a non industrial product.
8. Use of power tools is NOT recommended for assembling this product as over-tightening may occur and damage the product.
9. Due to the laminated finish of this item and the materials used to construct it, when first opening the carton and assembling a slight smell may be noticeable. This will dissipate over a short period of time. Please contact the retailer you purchased this item from if you have any concerns.
10. Please use caution and care when lifting the product to avoid personal injury and / or damage.

Care and Maintenance of your Furniture

- Please periodically check all fittings and re-tighten as necessary.
- To clean your item, please use a damp cloth and wipe clean. Never use harsh chemicals or strong detergents as this could damage the finish of your product.
- Never allow any kind of liquid to remain on your furniture. Absorption can cause wood to warp or finishes to de-laminate.
- Please do not place hot / cold items (e.g. hot drinks) directly on to the surface.
- Do not pull or drag your item. Ensure it is evenly supported and lifted while moving it.
- Avoid placing sharp objects on the surface as this may scratch the surface. It is recommended to use trivets or coasters under flowerpots, vases, cups etc to avoid damage to your item.

STEP 13

Insert all drawers into the cavity and make sure you follow the safety instructions below to attach the drawer stoppers.

IMPORTANT SAFETY INSTRUCTIONS:

To prevent the drawers from accidentally being pulled out during use you must push the dowel (F) through the provided hole on the side of the drawer. To do this ensure the hole for the dowel is still positioned behind the previously installed brackets on the left hand side panel. When correctly placed your drawer will function normally.

TIP : When installing the drawer stopper dowels, please make sure that the hole for the dowel is behind the metal drawer stopper to ensure correct install and drawer operates as normal

STEP 15

Bracket Fixing

The horizontal arms of the brackets are to be secured to the underside of shelf so that it is out of sight when the cabinet is installed into position.

- ☒ After assembling the unit place it against the wall where it will be permanently positioned.
- ☒ Working from inside the cabinet place the bracket through the pre-cut hole in the rear wall of the cabinet as shown in diagram.
- ☒ Use a pencil to mark through the screw hole in the bracket, where the bracket has to be attached to the wall.
- ☒ Move the cabinet away from the wall and secure the bracket to the wall at the marked position using a wall anchor suited to your wall surface.
- ☒ With the wall brackets in position, move the cabinet back to the wall allowing the horizontal arm of the bracket to enter into the cabinet through the pre-cut holes in the back wall of the cabinet.
- ☒ Then using the screw supplied, secure the horizontal arm of the brackets to the underside of the shelf.

WARNING:

ENSURE THAT WALL STRAP IS ATTACHED TO AVOID SERIOUS INJURY

To avoid any serious injury, this product has been supplied with a wall strap to prevent toppling.

Wall fixings hardware are not supplied as different surface materials require different types of fixing hardware & you must use suitable fixing hardware for different type of wall you intend to mount this product to wall.

Wall Mounting & Fixing Guide

If you have any doubts about using the correct plug for your wall, please seek professional advice.

Failure of the product due to using incorrect fixings is the responsibility of the installer.

IMPORTANT:

When drilling into walls, always check for hidden wires or pipes, etc.

Tips & Tricks

**Make sure that the hardware used is suitable for supporting your unit.
Please consult a qualified tradesperson if unsure.**

- ✓ If you are unsure, please select a larger screw and wall plug.
- ✓ Ensure that you use the recommended drill bit to match the wall plug and hole size.
- ✓ Take extra care when drilling high walls, ceiling and ceramic tiles. Ensure wall plugs are inserted beyond the thickness of the ceramic tiles to avoid splitting or cracking.
- ✓ Ensure that wall plugs are well fitted and are a tight fit in the drilled hole.

Types Of Walls

Use one of the following types of wall plug (not included) if your walls are made of brick, breeze block, concrete, stone or wood. Screws may be able to be fixed directly to solid wood walls as they will provide a secure anchor point.

1. General purpose wall plug

Generally aerated blocks should not be used to support heavy loads, use a specialist fitting in this case. For light loads, general purpose wall plugs can be used.

2. Plasterboard wall plug

For use when attaching light loads on to plasterboard partitions or hollow wooden doors.

3. Cavity fixing wall plug

For use with plasterboard partitions or hollow wooden doors.

4. Cavity fixing-heavy duty wall plug

For use when fitting or supporting heavy loads such as shelving, wall cabinets and coat racks.

5. Hammer fixing wall plug

For use with walls stuck with plasterboard. The hammer fixing allows it to be fixed to the wall rather than the plasterboard. Always check the fixing is secure to the retaining wall.

6. Shield anchor wall plug - heavy loads

For use with heavier loads such as TV & HiFi speakers and satellite dishes etc.
