

Pet Playpen

Insert the rods into the panel sidebar. You'll hear a 'click' sound when it's firmly assembled.

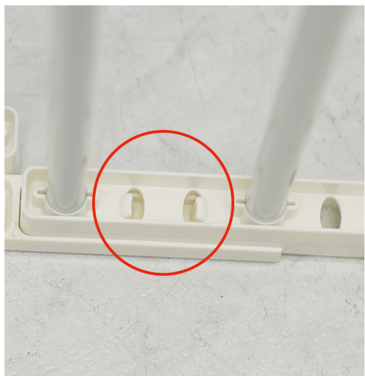

Install the other panel edge. Gently spin the rod to make it easier for this step.

Place the assembled panel on the ground and make sure all rods are well inserted.

Do the same to all other panels.

Connect the joints and the panels.

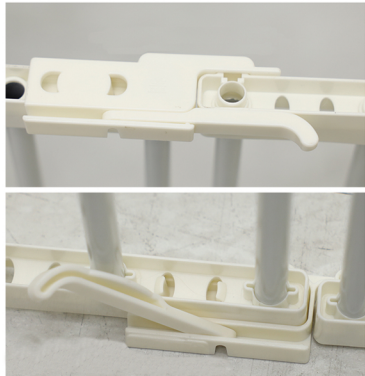

Straight joints and corner joints.

Connect the bottom joint first then the top joint to make it easier for assembly.

Door hinge, the longer side to be connected with the panel used as the door. Choose your desired opening direction by switching the 2 joints.

Door lock, with both top and bottom lock lifting upwards to unlock.

Double sided adhesive, optional depending on your floor.

Mission accomplished!

Left 2 pieces: DOOR LOCK

Right 2 pieces: DOOR HINGE
