

ROMAN CHAIR

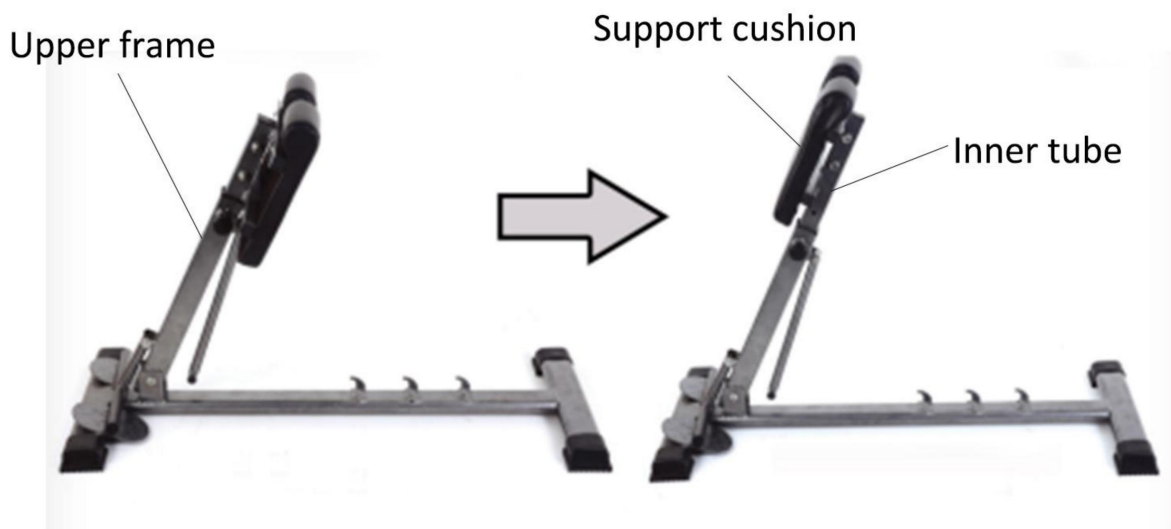

USER MANUAL

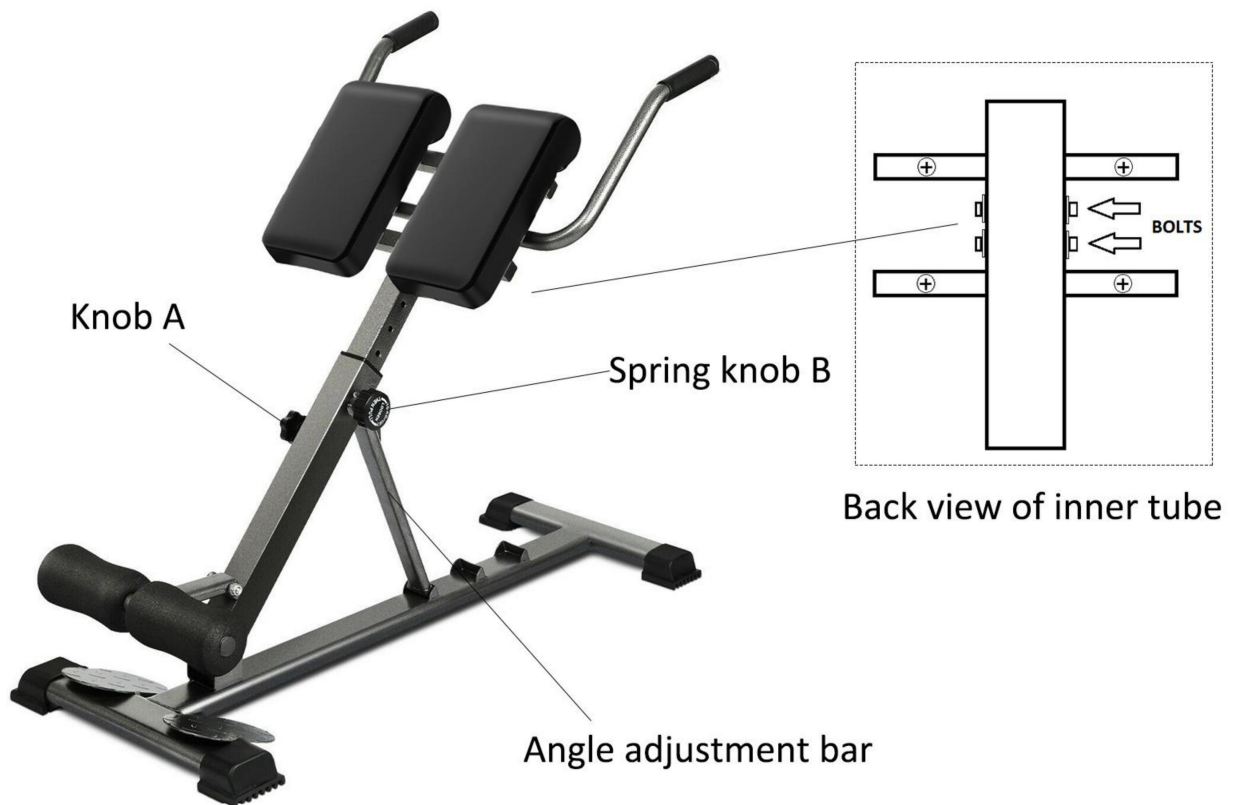

STEP 1:

- Open the package, check the parts as shown in the figure.
- Cut off the white plastic band on the main frame, then take out the 2 handles.
- Install 4 rubber feet on the legs.

STEP 2:

Lift up the upper frame and loosen the knobs on upper frame, then revise the inner tube(including the support cushion) as shown in the figure.

STEP 3:

Install the handles by bolts(8*55) as shown in the figure.

Angle adjustment:

Move the adjustment bar to different welded claw on the bottom frame, make sure the bar end is fully engaged in the claw.

Height adjustment:

The inner tube is 7-levels design. Loosen the knob A first, then pull up the spring knob B to adjust the position of inner tube.

Release spring knob B to lock the position. Remember to tighten the knob A at last.
